

**REMARKS**

The Notice to File Corrected Application Papers requested that replacement drawings and a new abstract be filed.

A complete set of formal drawings are attached. These include minor changes to address the concern that original Figures 1 and Figures 3A-3C included too much text. The text on the original drawings has been deleted and replaced with a shorter descriptive figure legend to address this concern. The amendments to the other drawings simply involve changes to ensure that the drawings comply with the technical requirements of 37 C.F.R. 1.84. These changes introduce no new matter.

A new abstract is also included on a separate sheet as requested. This abstract is the same as the abstract of parent application U.S. Application No. 09/454,711, which is incorporated by reference into the instant application (see first paragraph as amended in preliminary amendment filed with the current application). The abstract is also supported throughout the specification including, for example, at page 19, lines 3-14. The abstract thus adds no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 303-571-4000.

Respectfully submitted,

Scott L. Ausenhus
